

**Healey Primary School**

## **Geography Curriculum Statement**

### **Intent**

At Healey we shape our geography curriculum to fulfil the requirements of the National Curriculum for Geography; providing a broad and balanced curriculum; ensuring the progressive development of geographical concepts, knowledge and skills; and above all for the children to develop a love for geography.

We aim for a high-quality geography curriculum which inspires pupils with a curiosity and fascination about the world and its people. We particularly think about our local area, so children develop their understanding of where they live and their place in the world.

Our teaching equips pupils with knowledge about different places and people, resources in the human and natural environments, together with a deep understanding of the Earth's key physical and human processes. By revisiting these areas of learning regularly children will remember more, know more and understand more.

As pupils progress, their growing knowledge about the world should help them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments.

We want our children to gain confidence and have practical experiences of geographical knowledge, understanding and skills through the use of fieldwork and educational visits in order to explain how the Earth's features at different scales are shaped, interconnected and change over time.

### **Implementation**

To ensure high standards of teaching and learning in geography, we implement a curriculum that is progressive throughout the whole school. Geography is taught in each year group as a half-termly topic, three times a year, focusing on the knowledge and skills stated in the National Curriculum.

The geography curriculum at Healey School is based upon the 2014 Primary National Curriculum in England, which provides a broad framework and outlines the knowledge and skills taught in each Key Stage. Teachers plan lessons for their class using our progressive 'Steps to progress' document and topic Knowledge Organizers which ensures the curriculum is covered and the skills/knowledge taught is progressive from year group to year group. When teaching geography the teachers should follow the children's interests in the topic to ensure their learning is engaging, broad and balanced.

At Healey we provide a variety of opportunities for geography learning inside and outside the classroom. Every year group is encouraged to use the school resources and the local area to enhance their learning of both physical and human geography. Every pupil will experience Forest Schools at least once a year. These sessions are delivered by the school's qualified 'Forest School's' Practitioner. Those children with EHCP's will experience Forest School sessions more frequently in order to enrich their vocabulary and life experiences. The children also have many opportunities to experience geography on educational visits such as walks to Healey Dell in our local area.

### **Impact**

Pupils leave Healey with a secure understanding of the geography curriculum, developing a deep knowledge, understanding and appreciation of their local area and its place within the wider geographical context. The children will progressively develop the geographical knowledge, skills and vocabulary to help them explore, navigate and understand the world around them. Children will develop a love of the subject and deepen their understanding of the interaction between physical and human processes and how this affects landscapes and environments.

We measure the impact of our curriculum through the following methods:

- Marking of written work in books.
- Interviewing pupils about their learning.
- Book scrutiny and learning walks where there is the opportunity for a dialogue between teachers to understand their class's work.
